## J. LEE HACKETT CO.

1961 E. Milwaukee Ave., Detroit, Mich.

## Safety and Defense

With the world in a social and economic turmoil without precedent in history, the safety forces of industry must face the inescapable conclusion that prevailing conditions are certain to find reflection in increasing accident hazards and mounting levels of accident frequency and severity, according to Mr. Thomas P. Kearns in a recent National Safety Council News Letter.

This tendency toward higher accident levels is already apparent and the maximum of productive effort for defense seems far ahead, he continues. It inevitably follows that we must face these conditions and do the best we can to keep the percent-

## FOR SALE BY

## MISCELLANEOUS WANTS

## WANTED TO BUY

P. B. & L. Co.  
P.O. Box 6091 Beardsley Sta.,  
Bridgeport, Conn.

Nailers, Morgan, open back, 8, 9, or 10 track, with cleating bars, side arms, gauges, belt or gear driven, with 3 h.p. 220 v., 3 phase, a.c. induction motors. All in good working condition. Cash sale, (2).

age of increase below that in man-hour exposure. This is the challenge to safety organizations in every industrial plant through the state and nation.

Heavy labor turnover is universally recognized as one of the most prolific sources of abnormal accident hazards. It brings new and inexperienced men to strange jobs, and recalls to service many whom months of idleness have rendered unskillful. Along with these conditions comes a gradual letdown in the care exercised in normal times in placing men. The critical question is, how to maintain the tempo of educational and practical safety effort in these industries to match the steadily mounting pace of production.
